

# Responsive with Bootstrap: Portfolio Project by David Colón

## Bootstrap Burgers & Brewery

### 1. Introduction

I will be creating a website for a mock restaurant called “Bootstrap Burgers & Brewery.” This restaurant specializes in smashed style burgers, bistro style burgers, and only serve craft beer made on-site. Menu will be small yet focused. Menu items will be named after web development technologies and terms.

### 2. Expected List of Website Features

The goal of this website is to provide consumers with business information such as menu items, locations, images, deals, membership sign up, contact information, social media links, and (hopefully) online ordering.

### 3. Expected List of Bootstrap Features

- Navbar
- Cards
- Popovers
- Jumbotron
- Forms
- Tooltips
- Carousels
- Buttons
- Background images
- Media Objects
- Dropdowns

All components will be responsive and display well on multiple viewports where it is needed.

### 4. Market Survey

This site will draw inspiration from multiple business websites such as:

- Shake Shack
- Five Guys
- Yard House
- Elevation Burger
- Smashburger
- In-N-Out Burger
